DETAILED ACTION

Election/Restrictions

Pursuant to a telephone interview with Paula Borden on December 15, 2009, claims 15-18 and 21-22 are hereby rejoined and fully examined for patentability.

Because all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, **the restriction requirement as set forth in the Office action mailed on March 26, 2007 is hereby withdrawn.** In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided

by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Paula Borden on December 15, 2009.

The application has been amended as follows:

In Claim 15, line 1, after "comprising" insert —; a)—.

In Claim 15, line 2, after "(apoE)" insert —wherein the carboxyl-terminal truncated apoE comprises amino acids 244-260 of apoE; —.

In Claim 15, line 2, after "and", insert —b) —.

Allowable Subject Matter

Claims 1-4, 5-8 and 10-22 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art does not teach or suggest detection of carboxyl-terminal truncated apoE for diagnosing Alzheimer's Disease. It is noted that the prior art's disclosure regarding detection of apoE is different from detection of carboxyl-terminal truncated apoE, and in view of Applicant's amendment and response, the enablement rejection is withdrawn.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
